Oracle

Dear **Hiring Manager**,

I am writing to express my strong interest in the **Account Cloud Engineering (ACE) Intern (12-month program)** position at **Oracle**. I am currently a final-year Bachelor of Science in Information Technology student, with a focus on software testing, and I am eager to gain practical exposure within cloud and enterprise IT environments. While testing is my primary academic focus, I am open to any IT-related field that will allow me to learn, grow, and build a strong foundation for my career.

I am an **analytical thinker** with strong attention to detail and a structured approach to problem-solving. Throughout my studies and practical experience, I have developed the ability to assess systems, identify issues, and think critically about improving processes. My experience in **technical support at iQ** strengthened my troubleshooting skills, improved my understanding of real-world IT environments, and reinforced the importance of clear communication, reliability, and accountability.

My background in software testing has trained me to be detail-oriented, methodical, and quality-focused. I am comfortable working with requirements, validating system behavior, and identifying potential risks before they impact users. Alongside my academic training, I am committed to continuous learning and consistently seek opportunities to expand my understanding of IT concepts, cloud technologies, and enterprise systems.

What excites me most about the **ACE Internship Program** at **Oracle** is the opportunity to gain hands-on exposure to cloud-based solutions while learning from experienced professionals in a structured environment. I am particularly motivated by roles that involve analysis, collaboration, and supporting clients or teams through reliable and well-tested solutions.

I am highly motivated, adaptable, and eager to contribute wherever needed while developing my technical and professional skills. I would welcome the opportunity to discuss how my mindset, work ethic, and willingness to learn align with the goals of your team.

Thank you for considering my application. I look forward to the possibility of contributing to **Oracle** and grow through the ACE Internship Program.

Sincerely,

Novithan Naidoo

BSc IT Candidate
